

Season 1 Episode 22

Ultraverse Reboot Switch

In a rundown old town filled with deserted buildings and ancient statues and architecture, a group of green humanoids find a church. The church has a large window on the bell tower that has a yin-yang on the glass. The green humanoids search the church and they find books. They look through them and one of the green humanoids finds a book with a yin-yang on the front cover. The green creature said, "I think this is the book our master wanted." The lead green humanoid looks through the book and he finds a page that has a map of the Ultraverse and it shows the location and coordinates of a switch that rests in the middle of Ultraverse space. The lead member said, "This is just what our master wanted." The doors to the church blast open and Captain Ajax a blond-haired burly stud dressed in light blue armor with a yellow diamond gem symbol on his uniform enters the church armed with a ray gun and he is with other people dressed similar to him but in different colors and are also armed with ray guns. Captain Ajax said, "Put down that book. We can solve this peacefully." The green humanoids use their weapons on Ajax and his crew members and they fire back. Ajax shoots down a few of the green humanoids with his ray gun and the lead green humanoid beams up into space on his mothership. Ajax gets a call on his communicator. Ajax answers his communicator and the voice on the other end said, "Captain Ajax, the book you want is on a mothership that is cloaked in orbit. We must stop it." Ajax said, "Right you are. Beam us up at once." Ajax and his crew members are beamed back to their ship. Ajax runs to the bridge and his ship gets a lock on the mothership.

Ajax's ship uses a tractor beam and locks onto the alien mothership. The commander of the alien mothership looks at the book and he said, "This is the greatest day of my life. I finally found a way to get what should have been mine from the beginning." One of the green humanoids said, "Master Borgus. Our ship is in their tractor beam and they are willing to use any force necessary to get a hold of your book." Borgus is still looking overjoyed at the book. The green humanoid said, "Did you hear anything I just said?" Borgus said, "I have the thing that could get me anything I would ever want. Nothing else matters. Let them do what they want to do to us. Just have the book protected at all costs." The green humanoid said, "Sure whatever."

The green humanoids make their mothership go fast and they launch green slime-based weapons at Ajax's ship. Ajax's ship rumbles and some people fall over and some computers spark. Ajax said, "We need to get that book by any means necessary. Do you have a lock on the book?" One of the engineers said, "His ship is shielded with some hard metal alloy. We cannot get a lock on the book." Ajax said, "We are just going to have to cut a hole in their ship and beam it out that way. Get out hull cutters." Ajax's ship emits a particle beam that cuts a hole in the hull of Borgus' ship. Green humanoids go flying out the ship. Ajax said, "Do you have a lock on the book now?" The engineer said, "I have a lock on her now." Ajax said, "Beam her aboard." The book dematerializes from Borgus' grip and it ends up in the hands of Ajax. Borgus yells, "Curse you, Ajax! I hate you so much that I..." Ajax's ship fires several proton torpedoes into Borgus' ship and Borgus' explodes and Borgus is sent drifting through Ultraverse space.

Ajax looks through the book and his whole crew gathers around him. Ajax said, "This stuff is filled with ideas and philosophies inconceivable to regular people. All I can

infer is that we need an expert on this content to help guide us through the book so we can obtain the true knowledge of what this book has to offer.” One of the crewmembers shows the captain a tablet that has a picture of Ivan on the screen. The crewmember said, “I think I found our expert. It says here that Ivan is an expert on yin-yang philosophies and he has his nose constantly glued in books that deal with yin-yang lore. I think he would be our best bet.” Ajax said, “How did you find this guy?” The crewmember said, “You said you needed an expert so I just used a popular search engine and I found someone that could be of use.”

Ivan is in the monk dojo and he swings his sword around a training dummy and Ivan cuts the head off the dummy. Master Augi enters the dojo with Captain Ajax. Augi said, “Ivan. This is Captain Ajax. He is an Ultraverse renown explorer and holds the record for having traveled to more places in the known Ultraverse than anyone else. He paid a visit to our monastery because he wants to speak with you.” Ajax said, “Ivan. I have an important mission for you. I need you to look over the contents of a book. We should do this in private.”

Ivan and Ajax are in Ivan’s house and Ajax shows Ivan the book he recovered from Borgus. Ivan looks through the book. Ivan said, “This book actually shows the locations of the yin-yangite civilizations or at least where they used to be. This book is mostly all maps.” Ajax said, “That’s what I noticed but there is something very concerning in that book. Look at this.” Ajax shows Ivan the page of the book where it shows a switch in Ultraverse space and where it is located. Ajax said, “What could this switch be?” Ivan said, “I heard mentions of this switch in yin-yangite mythology. It is a switch that was believed to exist and if it were flipped, it would reset the continuity of the entire Ultraverse.” Ajax said, “What does that mean?” Ivan said, “If that switch is flipped, everything in the Ultraverse will be reset to the very beginning and we would not exist anymore. To make matters worse, the person that flipped the switch would be protected by a bubble that exists around the switch and they could in theory rewrite things in the continuity and change it for their own benefit.” Ajax said, “That must be why Borgus wanted this book so badly.” Ivan said, “Who’s Borgus?” Ajax said, “Borgus is a green humanoid alien criminal that has been interfering with my exploration missions for years now. He thinks the Ultraverse mistreated him and he wants to find treasures and rare pleasures and he wants to keep them all for himself. He likely wanted this book so he can find where that switch is so he can reset the Ultraverse and make it more to his liking. We have to stop him or anyone from doing this. We must find this switch and confirm it is there and then have security forces protecting it. It could be the most powerful thing in the Ultraverse.” Ivan said, “We should not try to find this switch. What if Borgus follows us there or some other evil force and they destroy us and flip the switch. That switch has been there since the formation of the Ultraverse and it has not been flipped once. I doubt anyone has ever found it before. If anything should be protected, it should be this book.”

Ivan and Ajax meet up with Master Augi in his office. Augi said, “I agree with Captain Ajax.” Ivan’s eyes go big. Augi said, “If something that dangerous does exist, we need to know about it. I am sending you on a mission to go to the location of that switch and find it and confirm it is there. I will then send monk security forces there to protect it. You are to come along and protect Ajax and his crew. You are free to bring your friends along too.”

Ivan, Safron, and Dirk gather in the meeting room on Ajax’s starship where Ajax sits in the center of attention. Ajax said, “We have plotted a course for the region on Ultraverse space that contains the continuity switch. We are joined by our yin-yang expert,

Ivan and two of his friends and they will be observing us on our quest to find this switch. It looks like the voyage is going to be several days and most of it appears to be in unpopulated regions. I say, grab a book or find something to watch because it is going to be a long flight." One of the engineers watches over this and he takes a good look at Ivan and Safron catches him taking a long glance at Ivan.

Ivan, Safron, and Dirk meet in Ivan's assigned living quarters. Dirk said, "This whole mission is dumb. Why do they want us to travel far away from everything just for a switch that no one has ever found?" Ivan said, "This must be some kind of plot. There must be someone that wants us far away from the main Ultraverse so they can do something and we won't be there." Safron said, "Maybe this is just a downright plan to get rid of us. This space seems to be unexplored. There could be all kinds of things out here that could get us killed or worse." Dirk said, "What could be worse?" Safron said, "We could get frozen as statues or turned into toys for some giant manchild or we might even get our minds flipped over or something." Ivan said, "I doubt that will happen. I read the yin-yangite books and they are pretty good with documenting dangers and there seems to be a clear route on this map to where the switch is. It is either been explored by a yin-yangite a long time ago or, they are just simply guessing based on scientific research. I like to think the former of those two." Safron gets close to Ivan and she said, "At least we have each other." Safron kisses Ivan. Ivan said, "Yeah. Of course."

It is bedtime and Ivan is in his yin-yang pajamas and he is brushing his teeth while looking at both yin-yangite books at the same time. Ivan heads to bed and shuts off his lights. While Ivan is asleep, the engineer that gave him a long glance quietly opens up the door to his bedroom. The engineer walks slowly and quietly and he sees the end table where Ivan has the yin-yangite books. Safron walks by Ivan's door and she said, "I think I may have..." Safron opens Ivan's door and she sees the engineer in there. The engineer quickly runs out and he pushes Safron aside and he runs out of Ivan's quarters.

Safron goes to the captain's office. Ajax is at his desk looking over reports and Safron enters. Ajax said, "Safron, what can I do for you?" Safron said, "One of your engineers was sneaking into Ivan's room and he was looking through Ivan's books." Ajax said, "He has all the reason to be interested in those books. They are the premise of this mission. They are the things guiding us. He probably needed to find a way to calibrate the engine so it can get to the location faster and more efficiently." Safron said, "There is something up with that engineer of yours. I saw him looking at Ivan the whole time as if he had some kind of fascination for him. I think you better watch that engineer of yours. I think he might be a traitor." Ajax said, "I can assure you. I do security checks all the time of all my crewmembers. None of them are evil if that's what you think." Safron said, "The fact that you run the security checks makes this sound more concerning."

Safron enters Dirk's quarters and Dirk is playing on a flip phone portable gaming system. Safron said, "Dirk. You need to keep a watch on one of the engineers. I think he is after Ivan and I think Captain Ajax might be behind this. He may be working for a much greater evil." Ajax is in his office and he gets a call from the suspicious engineer. The engineer said, "Captain Ajax. You might want to listen to this." Ajax hears what Safron is saying to Dirk. Safron and Dirk are thrown in the brig of the ship. Dirk said, "You're right. Something is going on here."

Ivan is brought to the engineering section. The suspicious engineer said, "Ivan. I want you to put these transistor cylinders into the compiler terminals." Ivan said, "Why are you getting me to do this? Shouldn't you be getting your engineers to take care of this?"

Also, where's Safron and Dirk? I haven't seen them all day." The engineer said, "I think they may have wandered off somewhere or maybe they lost themselves in something far more meaningful. I will let you do this." The engineer leaves Ivan alone in the engineering room. Ivan sees there are computers running. Ivan goes to one of them and he sees an engineer is logged into the computer but left the computer and didn't log off. Ivan looks through the files in the engineer's account. Ivan sees a document called, "Brig Records." Ivan opens the file and it shows entries with information and details on everyone that was ever brought to the brig of the ship. Ivan scrolls through the list and he sees the last two entries are Safron and Dirk. Ivan said, "Safron and Dirk are in the brig. Something is definitely wrong here."

Ivan leaves the engineering ward and he walks down the halls and he finds the security ward. Ivan confronts the main security desk worker and Ivan said, "Why are Safron and Dirk in the brig and why has no one told me?" The security worker said, "Safron and who? We don't have anyone that goes by that name in our brig right now." Ivan draws his sword and he smacks the security desk worker in the head with it. Ivan goes behind the desk and he presses buttons that open the magnetic bars in the brig. Ivan runs to the brig and he finds Safron and Dirk there. Ivan said, "Safron, Dirk? How did you get here?" Safron said, "Captain Ajax has some kind of plan to flip the reset switch and make the Ultraverse more to his liking. That is the only reason I can think of for why he jailed us for questioning him." Captain Ajax and the suspicious engineer enter the brig. Ajax said, "So you are in on it too?" Ivan said, "I demand an explanation for this." Ajax said, "Your friends betrayed us and not they are in the brig. It is as easy as that." Ivan draws his sword. Ivan said, "Something tells me that you are the main villain in all this." The suspicious engineer said, "Ajax is not the one behind this. I am." The engineer takes out his watch and he presses a button on it and a large ship like the one Borgus had earlier appears outside of Ajax's starship. Ajax grabs his ray gun and he points it at the engineer. Ajax said, "I knew Borgus had an agent on my ship." The engineer grabs Safron and Dirk and he presses a button on his belt and it beams him to Borgus' ship.

Ivan and Ajax go to the bridge where Borgus appears on the main viewscreen. Borgus said, "You are outmatched, Ajax. I have two of your friends. We can make a deal. You give me both of the yin-yangite books, and I will let you have both of your friends back. The choice is yours." Safron said, "You know bad guys never stay true to their word." A green humanoid ties metal wire around the arms and ankles of Safron and Dirk and they are placed in an enclosed space. Borgus said, "If you don't give me the books, I will waste your friends and force the books from you. I learned how to cut open the hull of your starships." Ajax said, "If you have the strength and power to do so and are not willing to negotiate anything with us, then you might as well just do what you want to do right now." Borgus said, "That's an awesome idea." Borgus sends a volley of particle beams at Ajax's ship. Ajax's ship gets cut up and parts of the ship fall off. Borgus controls his ship to the back of Ajax's ship and it latches on to Ajax's ship and Borgus uses turbo boosters to send them far into Ultraverse space while Ajax's ship leaves a trail of debris.

Ivan and Ajax are watching the viewscreen and they see the switch. Ajax said, "It looks like we finally made it." Borgus has the ship fly near the switch so it can be reached by standing on the roof of Ajax's ship. Borgus said, "It is about time I set things right." Ajax said, "Ensign, initiate the oxygen force field around the upper part of the ship. We are going out there and we are stopping Borgus." Ivan, Ajax, and several crewmembers armed with weapons go to the roof of the ship and they see Borgus and his green humanoids are there with Borgus' ship hovering over the battle. Ajax's crewmembers open fire on the green humanoids and Borgus. Borgus and his crewmembers use slime-

based weapons. One of the green humanoids grabs one of the crewmembers and he gets thrown out into space. More of the crew members get thrown into space. Ivan uses his sword and she slashes down some of the green humanoids. He sees Borgus is heading for the switch. Ivan slashes his sword at Borgus and Borgus knocks the sword out of Ivan's grip. Borgus grabs onto Ivan and he spins Ivan around and he grabs Ivan and flips Ivan in the air and he smashes Ivan down on his head. Crewmembers jump at Borgus and they latch onto Borgus and Borgus throws them off and into space. Ajax open fires his ray gun on Borgus.

Borgus punches the ship while Ajax is firing and the roof rumbles and Ajax falls back and he blasts a critical part of his ship. A female voice said, "Core reactor breach. The core reactor is unstable. The ship will have to destroy itself in two minutes." All of the crewmembers including Ajax are lying down in defeat or have been thrown into space. Ivan attempts to fight Borgus but Borgus keeps pushing Ivan off. Ivan tries to kick Borgus in the face and Borgus grabs onto Ivan's leg and throws Ivan backwards. Borgus is about to flip the switch and something is triggered in Ivan's mind. Ivan gets visions of his friends being captured and the Ultraverse getting reset with Borgus ruling over everything. Ivan begins to erupt in rage and a yin-yang is formed over him. A battle mech with an arm cannon and a sword for a hand is formed on Ivan.

Ivan blasts Borgus away from the switch. Ivan blasts Borgus and Borgus slides across the roof. Borgus summons his green humanoids and they come after Ivan. Ivan slashes them down and he blasts all of them off. Borgus calls his ship. Borgus said, "Bring in the heavier firepower. I want it all concentrated on Ivan." Safron and Dirk are in a small enclosure. Safron said, "There must be a way to get out of here." Dirk uses his strength and he pulls apart the metal wiring on his wrists and he destroys the metal wiring on his ankles. Safron said, "How did you do that?" Dirk said, "I have enhanced strength and agility." Dirk breaks the metal wiring off Safron and they head out the door and they get to the main controls of Borgus' ship. Dirk punches out the green humanoid and Safron takes control of the ship. Safron said, "This control scheme looks familiar. Control schemes like this are pretty standard in the Ultraverse." Safron open fires on Borgus. Borgus gets pummeled with green slime. The mech Ivan walks up to Borgus. Borgus said, "Can we call a truce?" Ivan uses his sword on one of his hands and he slashes Borgus in half.

Ivan throws the remains of Borgus into Ultraverse space. Safron and Dirk watch Borgus get cut in half and thrown into space. Dirk said, "Ivan showed him not to mess with us." Safron said, "Ivan, my hero." The suspicious engineer appears behind them and he grabs onto them and raises them. The engineer said, "You didn't think I would let you off that easy, would you?" Dirk elbows the engineer and it does nothing. The engineer uses slime and he glues Safron and Dirk to the wall. The engineer said, "You two are far too gullible."

Ivan looks at Borgus' ship and Ajax goes to Ivan. Ajax said, "My ship is about to explode. Everyone that can escape has escaped but us. I must go down with my ship." Ivan said, "We are getting out of here and you are coming with us." Ivan grabs onto Ajax and he jumps off and grabs onto Borgus's ship. Ivan cuts a hole in it and Ivan and Ajax jump into the ship. They walk through the ship and they find Safron and Dirk glued in slime with the engineer standing in front of them. The engineer said, "Ivan and Captain Ajax. Have you come to join me? You see, Borgus was a fool. There is no way he can rule the Ultraverse. I am the one that should be doing that. I will give you all our own parts of the Ultraverse and then we can rule like kings." Ajax takes out his ray gun and he blasts

at the engineer. The engineer falls and is wounded. Ivan uses his sword hand to cut the slime freeing Safron and Dirk. Ivan uses the slime and he glues the engineer to the wall. Safron gets to the controls. Safron said, "I am plotting a course to the Ultraverse mainland." Ajax looks at his former engineer and he said, "We are going to see what your fate is when we return." Ivan forms back into his normal self. Dirk said, "That was some awesome mech you made for yourself out there." Safron said, "Yeah. How did you do that?" Ivan said, "I know it pertains to my yin-yangite physiology. When some yin-yangites find themselves in dire need of assistance and there is none around, they may form into something that can aid them." Ajax said, "You were engulfed in all the action of Borgus going to reset the entire Ultraverse which would have impacted everything you have ever known." Ivan said, "Yet, I feel I could become something more and I feel that there is still a lot I don't know about this enigma." Safron controls Borgus' ship and makes it fly out into Ultraverse space. Borgus' separated body drifts through Ultraverse space and he watches his ship fly off into the distance.
